Victory Beer Suggestions: Golden Monkey (can), Sour Monkey (can), Brotherly Love (draft) and Victory Waves Seltzer (Mixed Pack Slim Cans)

Brontosaurus BBQ Burger + **Golden Monkey:**

- The higher alcohol content (9.5% ABV) and carbonation will cut through the greasy, fatty notes of the beef patty, cheese, and bacon.
- The banana and clove yeast flavors will meld nicely with the BBQ sauce.

Pterodactyl Turkey Burger + **Brotherly Love** and **Lime or Mango Waves Seltzer:**

- Brotherly Love will pair well here. Its big fruit forward hop flavors will combine with the roasted red peppers and pesto very nicely. Also, the overall drinkability of Brotherly Love will help prevent the beer from overpowering the Turkey Burgers subtleties.
- We recommend Lime and/or Mango Waves as seltzer options. They will all add a complementary fruit-forward flavor to the mix that would suggest another level of flavor, as if there were something like a lime mayo or peach chutney.

Southwest Burger + **Sour Monkey** and **Lime, Mango, or Orange Waves Seltzer:**

- The high flavor profile of Sour Monkey will match this high flavor burger. Big citrus acidity will slice through the all-beef burger, and orange and lime flavors will pair perfectly with the chipotle aioli and the pepperjack cheese.
- For the same reasons as above, Lime, Mango, and Orange Waves seltzer will bring bright fruit flavors that lean into the Southwest ingredients.

Standard Burger/Cheeseburger + **Golden Monkey** (or **Brotherly Love**) and **Mixed Berry Waves Seltzer:**

- Golden Monkey pairs nicely for the same reasons as the Brontosaurus Burger in terms of standing up to a hearty cheeseburger, OR Brotherly Love's drinkability is a great choice with a lower ABV (6%) for either the cheeseburger or hamburger.
- As an alternative, Mixed Berry seltzer brings a bold, berry flavor that contrasts the simplicity of a plain hamburger.
